Quality • Reliability • Integrity

Environmental Policy

Middle East Fuji Group believes in the concept of sustainable development, uniting protection of the natural and human environment with economic well-being. The Company integrates environmental considerations into its operations of Marine and offshore supplies of goods and materials to land based companies, hotels and other organizations; as well as provision of maker trained specialized engineering and technical services to marine, power and oil & gas industry.

To promote our environmental commitment at Middle East Fuji Group, we:

- Include environmental cost if your accounting /QHSE team can show reports.
- conduct our operations in an environmentally responsible manner;
- strive to meet the needs & expectations of our stakeholders; and applicable regulatory (including ISO 14001:2015) statutory and/or obligatory requirements.
- manage our activities to avoid, minimize and/or mitigate impact on the environment
- reduce the quantity waste generated from our operations / facilities through correct selection, efficient use, reuse and of resources;
- Ensure that our environmental policy is communicated to all relevant stakeholders, and we collaborate with them to achieve common environmental goals; and;
- ensure that our personnel are aware of their contribution to successful implementation of this policy and to continual improvement of our established environmental management system.

President
